Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Unit: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

Abundance categories (Cat.): C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

Other Site Characteristics

Extensa área montañosa del centro y norte de la Serra de Tramuntana que engloba los macizos de Fartàritx, el Tomir, el Massanella, Puig Major, Tossals, l'Ofre y la Sierra de Alfabia. Se trata de las montañas más altas de Mallorca y están formadas principalmente por calizas y dolomías del Secundario dispuestas en series de cabalgamientos que forman acantilados muy importantes en dirección SW-NE. Existen dos embalses en la zona.

4.2 Quality and importance

En la zona encontramos una gran variedad de hábitats del Anexo I de la Directiva que se encuentran bien representados y en buen estado de conservación. La presencia de numerosas especies de plantas que figuran en el Anexo II de la Directiva justifica su declaración como LIC. El Buitre negro y el Águila pescadora emplean la zona como área de alimentación, aunque no nidifiquen en ella. Sí que lo hacen varias especies prioritarias del Anexo I de la Directiva Aves que justifican su declaración como ZEPA.
